

THE CAMPAIGN FOR VIRGINIA TECH

Aspirations have never been higher. The university will raise \$1.5 billion in private support, engage more than 100,000 members of the Hokie community, and fuel ambitious new programs, initiatives, and capital projects.

Complex Problems

Every complex problem has many angles. Virginia Tech leverages its broad expertise and enlists its passionate students to find comprehensive answers.

Global Business and Analytics Complex

Because data literacy is now required in the working world, Virginia Tech is integrating data analysis into every discipline and will construct a four-building Global Business and Analytics Complex in Blacksburg.

Inclusion and Diversity

As it fulfills its land-grant mission to welcome all prepared residents of the commonwealth to an accessible education, the university is taking major steps to deliver graduates who can thrive on diverse, collaborative teams.

Health Sciences and Technology Campus

World-class researchers in Roanoke address health problems that affect millions. Their ability to move forward is enhanced by health sciences and technology collaboration that brings together experts from across Virginia Tech with outstanding partners like Carilion Clinic.

New Era in Greater D.C.

The university's growing presence in the D.C. area includes adding a 1-million-square-foot Innovation Campus in the D.C. area to help address a critical need for tech talent. This is a game-changing addition, both on its own and in helping to attract businesses like Amazon to the commonwealth.

Reimagining Education

New programs are being introduced that focus on collaborating across disciplines and engaging with real-world problems.

Boundless Impact: The Campaign for Virginia Tech

You have the power to propel the university's ambitious trajectory for growth and greater impact in Virginia and beyond. Learn more.
