CAN'T WAIT TO CHANGE THE WORLD? NEITHER CAN WE

Attention

Complex problems call for skilled, adaptive leadership.

At Virginia Tech's Center for Leadership in Global Sustainability, we prepare professionals to address today's most pressing environmental challenges—with insight, integrity, and systems-level thinking.

This is where your career evolves, and your impact begins.

Connection

Choose from two Master of Natural Resources programs designed to help you lead in a time that demands greater clarity, collaboration, and courage. Focus on the global challenges that matter most to you—such as climate, biodiversity, energy, habitat, or the transition to more sustainable systems. Gain the skills and perspective to drive change with confidence.

Wherever you are in your career, there's a path forward. The Online MNR offers a flexible format that supports your goals, whether you're looking to deepen your resource management expertise, pivot to an environmental career, or build new leadership skills. The Executive MNR is a one-year, hybrid, cohort-based program for professionals ready to elevate their impact – including monthly immersive class weekends, with six held online and five held on campus in the Washington, D.C. area, and culminating in a unique Global Study field experience.

Both programs are grounded in applied learning, career development, and the belief that leadership is something you build through real experience, not just theory.

Action

Two paths. One shared direction: forward.

Whether you're new to environmental conservation or stepping up as a leader, we'll help you find the program that fits.

Take the next step toward impact at Virginia Tech's Center for Leadership in Global Sustainability.
